

The new-generation SOPHiA DDM™ Platform is now live!

Get ready for a multitude of enhanced SOPHiA DDM™ capabilities!

New Interface

Improved capabilities and new interface to ease onboarding and reduce turnaround time

New Features and Applications

Including:

- Point-based ACMG classification
- Splicing predictors
- Selectable transcripts
- VCF processing
- Whole genome sequencing*

Unique workspace

One workspace to host all IVD and RUO Applications and Features

Web Access

Simplifying installation and updates

Single Platform

Access our Genomics, Radiomics, and Multimodal analytical factories

Revamped Architecture

Boosting performance and accelerating new feature implementation

Data Protection

No changes to data management and security, ensuring your data is protected with the most stringent compliance

Analytical pipelines and performance will remain **the same**

SOPHiA DDM™ is CE marked under IVDR

Supporting patient diagnostics in the EU and other regions when in **Dx Mode**
